

GOLF IRRIGATION SYSTEM

HELPS TO PROMOTE SUSTAINABILITY BY CONSERVING WATER AND REDUCING WATER WASTE. BY USING EFFICIENT IRRIGATION SYSTEMS, GOLF COURSES CAN REDUCE WATER CONSUMPTION BY UP TO 50%.

The irrigation system used at The New Course allows precise adjustments to water flow and pressure. With the ability to fine-tune the coverage and distribution of water in specific areas, results in more efficient water usage.

Members of the United Nations pledged to implement 17 Sustainable Development Goals (UNSDGs) - a shared blueprint for advancement of a sustainable, inclusive and just society.

SICC has aligned our sustainability journey with these goals and has recently gathered more than 125 sustainable initiatives that cover 9 UNSDGs.

TOGETHER WE CAN MAKE A DIFFERENCE
