

RESPONSIBLE WASTE MANAGEMENT

REDUCE – The most important strategy to manage waste!

Our food packaging are made from bioplastics that emits 75% less carbon emissions compared to conventional plastics!

Our utensils are made from responsibly-sourced wood that produce net-zero carbon emissions!

Minimise your environmental impact and waste produced by purchasing and using responsibly through the use of environmentally friendly alternatives.

SICC has replaced all plastic cutleries and food packaging with products predominantly made from renewable materials and certified compostable.

SUSTAINABLE DEVELOPMENT GOALS

Members of the United Nations pledged to implement 17 Sustainable Development Goals (UNSDGs) - a shared blueprint for advancement of a sustainable, inclusive and just society.

SICC has aligned our sustainability journey with these goals and has recently gathered more than 125 sustainable initiatives that cover 9 UNSDGs.

TOGETHER WE CAN MAKE A DIFFERENCE
