

# Farm to Table, Sustainably

Local produce often requires less packaging and preservation, reducing the carbon footprint associated with food distribution.

SICC has an on-site herb and vegetable garden that grows basic food ingredients (e.g., blue pea, pandan, local mint, chili, Thai basil) for use in our F&B outlets.

## SUSTAINABLE DEVELOPMENT GOALS

Members of the United Nations pledged to implement 17 Sustainable Development Goals (UNSDGs) - a shared blueprint for advancement of a sustainable, inclusive and just society.

SICC has aligned our sustainability journey with these goals and has recently gathered more than 125 sustainability initiatives that cover 9 UNSDGs.
