

Wildlife Conservation

Our planet consists of delicate webs of interconnected species, each playing a unique role in maintaining the balance of ecosystems.

SICC has worked together with various wildlife/nature organisations to better manage our biodiversity and will continue to dedicate efforts to conserve and enhance the unique biodiversity around the Club.

SUSTAINABLE DEVELOPMENT GOALS

Members of the United Nations pledged to implement 17 Sustainable Development Goals (UNSDGs) - a shared blueprint for advancement of a sustainable, inclusive and just society.

SICC has aligned our sustainability journey with these goals and has recently gathered more than 125 sustainable initiatives that cover 9 UNSDGs.
