

SICC SHOWS WE CARE

Environmentally Friendly, Even For Takeouts

We have made the move to ensure that we minimise our impact on the environment – our food packaging for takeaways are either bio-degradable or food compostable. Beyond that, we ensure that their materials are from ethical, rapidly renewable sources and/or are an agricultural by-product.

Together, we can make a difference and play a bigger part in our environment.

Find out more about the materials we use by
visiting our social media platforms.
