

GO GREEN. BE SUSTAINABLE

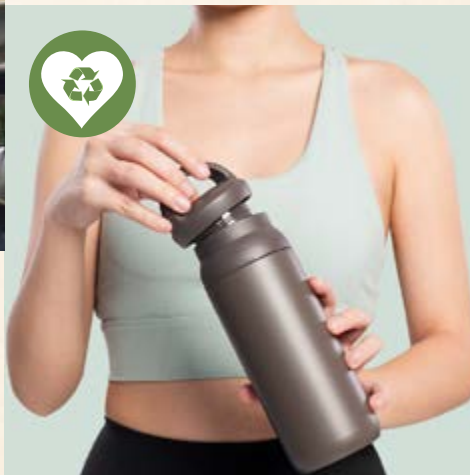

Join in our sustainability efforts to save our Earth by adopting a clean and and green lifestyle.

Go Digital

Be paperless with SICC Mobile App! Opt out of hardcopy statements, bookings, Islander Magazine and more by updating your communication preferences in your Member's account via the SICC Mobile App or SICC Website.

Reduce, Reuse and Recycle

One way to reduce is to reuse and recycle. Reuse your water bottles to quench your thirst at our water dispensers available at our F&B restaurants and golf buggy area.

Educate

Action begins from awareness. Do you know that the average person receives around 13kg of paper mail annually? We offer digital version of our Statement of Accounts, learn more about SICC green initiatives and spread the word on how to go green with us.

Energy-Efficiency

Members and Guests are encouraged to switch off all lights and electrical appliances after use.

Natural

Use recycling bins around the Club premise for green waste management.

The Club's Current Sustainability Initiatives

- Replaced all one-use bags and utensils to eco-recyclable versions.
- Electric Vehicles (EV) Chargers readily available in the Island Location.
- Installation of air to water dispensers that uses only electrical power.
- LED lights in all sports venues, time systems for ACMW and motion sensors lightings to conserve energy.
- Cleaning products used around the Club are sustainable and ethically sourced.
- Using of nano-coating products for surface finishes around the club to reduce use of water during washing.
- Server room air cooling system temperature set to 25 degree Celsius to conserve energy.
- Virtualisation servers used instead of multiple individual servers to reduce energy consumption.
- Adopting electronic means of transmitting information internally to reduce paper waste.
- Purchasing only compostable and biodegradable products.
