

Smarter by Design, Greener by Nature

Designed by acclaimed Course architects Nelson & Haworth, the redeveloped The Island Course integrates modern enhancements in strategy, safety, and sustainability. Employing a water-efficient golf course irrigation system with targeted irrigation management, the Course maximises efficient resource usage and creates a superior playing experience for our golfers.

- **Smart Irrigation System:** A centralised, remotely monitored solution using smart sprinklers to minimise water usage and disruption, supporting the creation of a more resilient urban space.
- **Targeted Irrigation Management:** Original soil profile retained in non-play areas to reduce maintenance needs and redirect water where it matters most, promoting broader ecological balance across developed areas.

Now Open for Play

SICC is committed to social sustainability, and we believe that it is important to create a more just and equitable society for all. We invite you to join us in our efforts to make a difference.

Members of the United Nations pledged to implement 17 Sustainable Development Goals (UNSDGs) - a shared blueprint for advancement of a sustainable, inclusive and just society.

SICC has aligned our sustainability journey with these goals and has recently gathered more than 125 sustainable initiatives that cover 9 UNSDGs.
